DETAILED ACTION

Allowable Subject Matter

- 1. Claims 1 and 3 are allowed.
- 2. The following is an examiner's statement of reasons for allowance.

Burri disclose the construction of a stepping motor, comprising:

exciting coils provided along a peripheral surface of a rotor provided with a plurality of N/S poles so as to rotate following a change of an excitation state of the exciting coils;

a driven member linked with the rotor;

a stopper for mechanically stopping the driven member at a predetermined position;

a first exciting means to normally or reversely rotate the rotor by controlling the excitation state of the exciting coils;

a second exciting means for reversing the rotor in a direction of making the driven member move toward the predetermined position by controlling the excitation state of the exciting coils;

a position detecting means for detecting the driven member having abutted the stopper and stopped at the predetermined position on a basis of induction voltage generated in the detecting coil during control by the second exciting means; and

a controlling means for stopping the first exciting means controlling and starting the second exciting means controlling when an instruction signal is inputted, and for starting the first exciting means controlling and stops the second exciting means

Application/Control Number: 09/826,359

Art Unit: 2834

controlling when the position detecting means detects the driven member having stopped at the predetermined position.

Tanikoshi teach the use of a detecting coil in the construction of a DC motor for the purpose of applying a detected voltage to the output terminals of the bridge circuit through the matching circuit so that the rotation of the servomotor may be retarded.

The prior art of record, taken alone or in combination, fails to teach the construction of a driving apparatus as described on independent claims 1 and 3, wherein the exciting coils are provided along a peripheral surface of the rotor, and the detecting coil is provided at a center of a longest peripheral surface between adjoining exciting coils.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. See PTO-892.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Pedro J. Cuevas whose telephone number is (703) 308-4904. The examiner can normally be reached on M-F from 8:30 - 6:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Nestor R. Ramírez can be reached on (703) 308-1371. The fax phone numbers for
